Office Action Summary

Art Unit: 1732

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-10, drawn to a method of making synthetic wood-like products, classified in class 264, subclass 45.3.
 - II. Claims 11-20, drawn to a synthetic wood-like product, classified in class 428, subclass 326.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product structure as claimed, or as imputed from the steps practiced, can be made by another and materially different process such as on in which the mixing in the hot mixer occurs using external heating under conditions such that substantially no frictionally induced heating occurs. See MPEP 2113 with regard to the examination of product-by-process claims.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art requiring divergent fields of search for the respective inventions, restriction for examination purposes as indicated is proper.

4. A telephone call was made to Kenneth P. Glynn on December 4, 2002 to request an oral election to the above restriction requirement, but did not result in an election being made.

Art Unit: 1732

5. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).
